ABOUT US.

At SKIN-LAB™ Balen, our team of therapists works with CE-certified lasers and SkinPen® technology for safe, targeted aesthetic treatments. Although our lasers can treat a wide range of concerns, our therapists often recommend the advanced SkinPen® technology when it can deliver even better results. Every client receives a personal skin analysis and a tailored treatment plan in our private clinic, with one-to-one appointments. Our aesthetic treatments are supported with Rebiome skincare to restore the skin barrier and help maintain long-lasting results.
